Team

WHO WE ARE..

Team with more than 12 years of experience in field of molds and die casting.

Dedicated to the development and manufacture of molds injection. Commits to competition and professionalism.

With experienced professionals capable of exceeding the quality requirements in the market.

Quality and customer satisfaction is the main focus. With cutting-edge technology at your disposal, which allows to respond effectively to the needs imposed.

Specialists in the manufacture of molds injection for plastics and other materials.

Arangine is associated with small and medium mold manufacturing companies, in association with project management services and experience in engineering, and is competitive and competent in international markets.

Arangine is a company with a vision of the future, aims at the sustainable growth of the structure.

SERVICES..

experience

commitment

SERVICES..

Product design

We have a professional team capable of leading design and product development projects, contributing all the experience gained through multiple national and international projects..

Means of manufacture

Thanks to our strategic alliance with different companies, with more than 40 years of experience in producing progressive matrices and transfer in different industrial sectors, we have a large production capacity, both nationally and internationally.

Cold stamping

We shape the the sheet through the cold stamping, we cover all possible measures, from small reinforcements to structural parts, such as stringers, internal flanks, as well as moving parts, gate, doors, bonnet and even flanks.

Plastic injection molds

Injection moulding (or molding, to us the US spelling), along with extrusion ranks as one of the prime processes for producing plastics articles. It is a fast process and is used to produce large numbers of identical items from high precision engineering components to disposable consumer goods.

SERVICES..

Arangine delivery model

We can offer several solutions or work options, adapting to the requirements of the company and the project in particular, in this way you can absorb the production peaks without increasing the templates of costumers.

Production media design

We have all the knowledge and experience necessary to offer the best possible design, within the highest quality standards, efficient and competitive, to cover all the requirements of our costumers.

Products

Currently our product portfolio includes all the necessary tools for the manufacture of stamped and machined metal components, as well as the transformation of plastic through injection.

Hot stamping

Due to the need within the automotive world to lighten the weight of the bodies by saving fuel but without losing structural rigidity, hardened parts are manufactured from heat, in a process that we call hot stamping.
